

Working with Google

A) Usage of Google forms

Aim: To sort and search emails.

Algorithm:

Step 1: Start the process.

Step 2: Go to docs.google.com/forms.

Step 3: Click **Blank form** to create a new form.

Step 4: Use various functions and templates to create the form

Step 5: View and share the created form.

Step 5: Stop the process.

Output;

The screenshot displays a Google Form titled "Google Form Sample". At the top, it states "Here are all of the question types". Below this, the form owner's information is shown: "manny.juan@gmail.com" with a "Switch account" link and a "Not shared" status. The form contains four question types:

- This is a text question:** "Limited space for typed response. Great space for name of respondee or short answer". It includes a text input field labeled "Your answer".
- This is a paragraph question:** "Extended space for longer answer". It includes a text input field labeled "Your answer".
- This is a multiple choice question:** "May click one of the choices or respond to 'other'". It features three radio button options: "Choice 1", "Choice 2", and "Other:" followed by a text input field.
- This is a checkbox question:** "Similar to multiple choice; multiple responses available". It features three checkbox options: "Choice 1", "Choice 2", and "Other:" followed by a text input field.

RESULT:

Thus the Google forms has been created and viewed successfully.
